Mineral Alloy by Benjamin Moore

Mineral Alloy takes boring "millennial gray" and infuses it with character and depth. It's a much deeper gray with lots of blue that has a calming effect, making it perfect for bedrooms, bathrooms and anywhere you want to create a serene and cozy sanctuary.

Linda Weisberg of LW Interiors says she loves color-drenching with this hue. "It's a lovely, mid-tone blue color that goes well with both neutrals and deep green hues," she says. Pair it with other earthy hues, like a bright kelly green, dark blue and wood tones, as pictured in this bedroom designed by Weisberg.
